Techzone Electronics Website

README Documentation

1. Project Overview

Techzone Electronics is a multi-page website designed to present electronic products and technology solutions in a clear and professional manner.

2. Website Pages

- **Home:** index.html
- **Products:** products.html
- **About:** about.html
- **Enquiry:** enquiry.html
- **Contact:** contact.html

3. File and Folder Structure

```
techzone-electronics/  
├── index.html  
├── products.html  
├── about.html  
├── enquiry.html  
├── contact.html  
├── css/  
│   └── style.css  
├── js/  
│   └── script.js  
└── images/  
    ├── laptop.jpg  
    ├── phone.webp  
    └── other product images
```

4. Technologies Used

- **HTML5:** Used to create the structure and content of the website.
- **CSS3:** Used for styling, layout, colours, navigation, product cards and responsive design.
- **JavaScript:** Used to add interactive features and functionality.

5. Development Status

The HTML structure and basic website content are currently being developed.

CSS and JavaScript are still in process.

- HTML: **In progress / developed**
- CSS: **Still in process**
- JavaScript: **Still in process**

CSS will be completed to improve the appearance, layout and responsiveness of the website. JavaScript will be completed to provide interactive features and functionality.

6. Images and Content

Product images are stored in the **images** folder. Clear and consistent file names are used to keep the project organised.

7. Website Navigation

The main navigation connects the following pages:

Home → Products → About → Enquiry → Contact

8. Sitemap

- Home
 - Products
 - About
 - Enquiry
 - Contact

9. How to Run the Website

1. Open the project folder in Visual Studio Code.
2. Make sure all HTML files are in the root folder.
3. Make sure **style.css** is inside the **css** folder.
4. Make sure **script.js** is inside the **js** folder.
5. Make sure product images are inside the **images** folder.
6. Open **index.html** in a web browser.
7. Test all navigation links.

10. Future Improvements

- Complete CSS styling.
- Complete JavaScript functionality.
- Improve responsive design for phones, tablets and computers.

- Improve product cards and product images.
- Add form validation to the enquiry and contact pages.
- Test all website links and features before submission.

11. Project Purpose

The purpose of this project is to demonstrate website planning, file organisation, HTML development, content presentation and the use of CSS and JavaScript to develop a professional multi-page electronics website.
