

3 research and contents

Step3: research

3.1 organisation research

Tech zone electronics is a hypothetical electronics retail business based in Polokwane, Limpopo , south Africa . The business provides electronic products such as laptops, smartphones, printers, headset and computer accessories.

Research was conducted to understand how electronics businesses present products and information online. The research focused on product categories, product descriptions, images, customer enquiries, contact information and website navigation

The target audience for tech zone electronics includes students, workers, families, gamers, and small businesses looking for affordable electronic products.

3.2 content sources

The website content will come from a combination of original content and appropriately sourced resources.

- . Original descriptions written for tech zone electronics.
- . Product information created for the project.
- . Product images obtained from sources that permit reuse.
- . Icons and other visual resources where permitted.
- . Research from existing electronics websites to understand common website structures .

Step 4: website content
